16 non-interference operation at the same installation:

Group 1 ~ 10: Each has 16 non-interference channels inside each group.

48 non-interference operation at the same installation:

Group 11 ~ 15: Each has 48 non-interference channels inside each group. Ascertain microphones are, at least, 3 meters away from receivers, non-interference operation can be achieved.

Frequency Band : 5UB

16 non-interference operation at the same installation:

Group 1 ~ 10: Each has 16 non-interference channels inside each group.

48 non-interference operation at the same installation:

Group 11 ~ 15: Each has 48 non-interference channels inside each group. Ascertain microphones are, at least, 3 meters away from receivers, non-interference operation can be achieved.

Frequency Band: 7UA

16 non-interference operation at the same installation:

Group 1 ~ 10: Each has 16 non-interference channels inside each group.

48 non-interference operation at the same installation:

Group 11 ~ 15: Each has 48 non-interference channels inside each group. Ascertain microphones are, at least, 3 meters away from receivers, non-interference operation can be achieved.
