\*\*\*\* Remarks:

- Interference might occur among groups. For best interference-free operation, please use frequencies in the same group (ex. Group 1 only, Group 2 only, etc.)
- If interference occurs while using same group, please use another group for ALL receivers.

#### **16 non-interference operation at the same installation:**

- **Group 1 ~ 2:** Each has 16 non-interference channels inside each group. However, the distance between 2 transmitters must be at least 30cm.

#### **48 non-interference operation at the same installation:**

- **Group 3 ~ 6:** Each has 48 non-interference channels inside each group. Ascertain microphones are, at least, 3 meters away from receivers. However, the distance between 2 transmitters must be at least 30cm.

#### **Group 7 : 16 User-Defined Frequencies.**
